# NEW & NOTABLE

## video GAME

If Tiger Woods' swing speed was his car, he'd lose his driver's license. The world #1 routinely whips his clubhead 130 mph, thereby doubling most states' legal speed limit. Whether you've watched him on TV or from a few feet away, you know how hard it is for the human eye to detect the subtleties of his swing.

Of course, most of us don't swing the club as fast as Tiger, but that hasn't stopped consumers from gravitating to technologies

that help them slow down and magnify the finer points of their swing.

While most swing analysis software is geared toward instructors, consumers are experimenting with them too. In fact, some software, like the V1 Home Edition, is cheaper than a lesson. The advantages are obvious: Software and technology not only help slow things down, but also enable the user to identify those subtle, hard-to-capture moments.

Scoring Shots

### SEE SWING

**What It Is:** A mobile "recording unit" that captures and analyzes golf swings.  
**What It Does:** Measures golf swings from three angles (top, front and behind).  
**How To Use It:** See Swing is big (350 square feet with its SafeNet Netting system) and is mostly found at special events.

### K VEST

**What It Is:** A lightweight shoulder harness and hip belt.  
**What It Does:** Measures hip, shoulder and arm movements, creating a 3-D representation on a monitor.  
**How To Use It:** Auditory feedback tells the user when he's in the right position.

### P3 PRO SWING

**What It Is:** A personal swing analyzer, instructional aid and simulator.  
**What It Does:** Measures club speed, tempo, swing plane, ballflight and clubface position at impact.  
**How To Use It:** Swing over the sensing platform; data is shown on the monitor.

### V1

**What It Is:** Swing-analysis software  
**What It Does:** Users can view split-screen comparisons of a swing, freeze replays and synchronize two swings in slow motion, among other cool functions.  
**How To Use It:** Capture a swing and use V1's tools to break it down.

### INPRACTIS

**What It Is:** Swing-analysis software  
**What It Does:** Captures, analyzes and allows users to e-mail their swings over the internet to an instructor.  
**How To Use It:** Download the software from [inpractis.com](http://inpractis.com), import your swing and e-mail to your instructor for review.
